Presenting Information Technology with **Clarity & Passion.**

It could be said that **Information Technology (IT)** is a boring subject, and that it should be reserved for conversation between specialists and tech junkies . And yet, **it is one of the most relevant subjects in a global community that relies on the networking and infrastructure that bind us together.** If there is a lackluster perception of the IT industry, it largely is a consequence of the complex technical terminologies and explanations offered by people in the industry. Thankfully, there ARE people who can take the perceived complexities of technology and richly break them down for the everyday user to easily grasp in an interesting and entertaining way.

Introducing David Papp

David Papp is a well known expert in the field of Information Technology who has learned and practiced his trade in Alberta, Canada throughout his professional career. His dynamic **personality, experience** and **knowledge** gained from over twenty years in the technology industry has made him a highly sought expert for presentations, IT services, training and consultation. This experience has made him well aware of the gap that usually exists between a technically minded expert and an everyday technology user, who is often unfamiliar with industry terminologies and specifications. This realization has made him a highly effective speaker and presenter, bringing an **engaging** and **passionate speaking style** which both **educates** and **entertains his audiences.**

About David Papp

your technology **advisor**

David Papp is an international IT consultant with over twenty years' experience in IT systems and serves as a keynote **speaker** on numerous IT topics. He has experienced the growth and success of founding and managing many businesses including his own **consulting** and technology business, Microtek Corporation, in 1991, which has evolved into a multi-faceted one-stop shop for his clients. His clients range from small businesses to large organizations. He enjoys building and maintaining a strong business relationship with his clients acting as their trusted technology advisor.

Through his growth, his reputation as an **expert** has steadily increased. He appears on TV and in the news as an industry analyst. In addition to numerous industry certifications (Cisco, Microsoft, VMware, security, auditing), David has a professional computer engineering degree. He is an active member of the Canadian Association of Professional Speakers and enjoys sharing his expertise with audiences throughout the world.

He recently **authored a book** entitled "*IT Survival Guide: Conquering Information Technology in Your Organization*".
